a
166
in the registry
151
carrying a value
the only stage that widens
513
split by level of theory
197
at least 10,000 crystals
176
built as training sets
b
pool wide
porous
ion conducting
gapped
pool wide biased labels
synthesized only
framework
magnetic
surface derived
layered

Training sets
c
whole pool
May be asked about
Crystals already labelled
d
tier 1
tier 2
tier 3
below the floor
the sources set
Held-out error of the model
Cross-source spread of the label
e
computed by a source
after the completion
band gap
formation energy
hull distance
bulk modulus
dielectric constant
Seebeck
thermal conductivity
work function
Pool covered (%)
f
inside a declared domain
passes the property filter
ranked above the known best
survives recomputation
